

SOYBEAN POLYMER

DISCO SILVER L-1901

Optimal aesthetics, visibility, and coverage without the hassle of powders

Improved wet-flow performance on standard slurry rates

Improved dry-flow versus standard packages

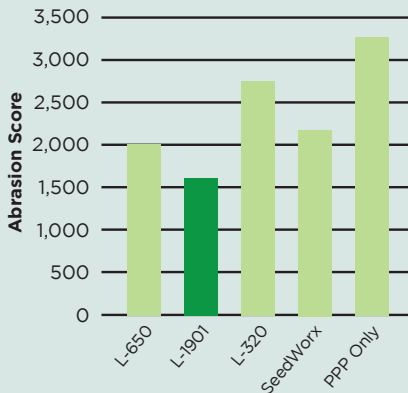

Easy application—just spike your current ready-to-apply protection package

Minimized dust and improved flow

PROVING IT

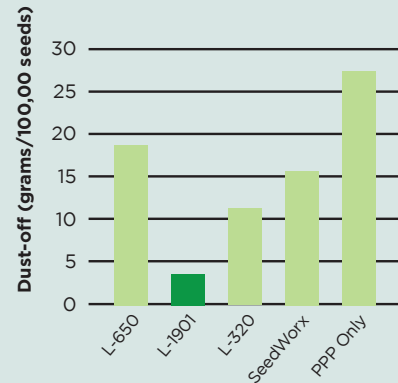

ABRASION

The lower the value, the better.

DUST-OFF

Less dust means optimal protection of your seeds and less exposure to dust.

WET & DRY FLOW

The better the flowability, the more efficiently the seed treatment & handling process will perform.

SOYBEAN POLYMER

L-1901 & L-650 with inoculant

PROVING IT

RHIZOBIA VIABILITY

L-1901 and L-650 does not kill inoculant
